

Instructions for Submitting Athletic Paperwork

Sports Physicals and Consent Forms will only be accepted through the online portal.

Once you have a completed sports physical, follow the instructions below.

Online Athletic Clearance Instructions

- 1. Complete physical/consent forms. Visit AthleticClearance.com. Click on the Florida Icon.
- Click on "<u>Create an Account</u>" and follow steps...or Sign in if you have previously created an account. Watch tutorial video if help is needed.
- 3. Register. PARENTS register with valid email username and password. Save details for future logins.
- 4. Login using your email address that you registered with.
- 5. Select "Start Clearance Here" to start the process.
- 6. <u>Choose the School Year</u> in which the student plans to participate. *Example: Football in Sept 2021 would be the 2021-2022 School Year.*
 - Choose the School...Academy at the Lakes.
 - Choose each sport your child will play. You can click on "Add New Sport" if a multi-sport athlete. Electronic signatures will be applied to the additional sports/activities.
- 7. Complete all required fields for Student Information, Educational History, Medical History and Signature Forms. Follow instructions and download all paperwork including Sports Physical, all Consent Forms, Athletic Handbook Agreement, and any other required forms.
 - If you have gone through the AthleticClearance.com process before, you will select the Student and Parent/Guardian from the dropdown menu on those pages.

Forms to be completed/downloaded...

Physical (EL2)

Consent Forms (EL3)

Athletic Handbook Agreement

Parental Consent for Student Driver

Videos/Completion Tests to be completed...

Concussion in Sports

Sudden Cardiac Arrest

Heat Illness Prevention

- 8. Once you reach the Confirmation Message you have completed the process.
- All of this data will be electronically filed with your school's athletic department for review. When the student has been cleared for participation, an email notification will be sent.

Online Athletic Clearance FAQ

What is my Username?

Your username is the email address that you registered with.

Multiple Sports

On the first step of the process you have the ability to "Add New Sport". If you use this option, you fill out the clearance one time and it is applied all sports selected.

If you complete a clearance and come back at a later date to add a sport, you will "Start New Clearance" and then autofill student and parent information using the dropdown menus on those pages.

Physicals

The physical form can be downloaded on Files page.

Why haven't I been cleared?

Your school will review the information you have submitted. You will receive an email when the student's status is updated.

My sport is not listed!

Please contact your school's athletic department and ask for your sport to be activated.

PREPARTICIPATION PHYSICAL EVALUATION (Page 1 of 4)

This medical history form should be retained by the healthcare provider and/or parent. This form is valid for 365 calendar days from the date signed below.

participate in conditioning and practices in the summer months and other times of extreme heat. Student-athletes suffer heat-related illness when their bodies cannot properly cool themselves by sweating. Sweating is the body's natural air conditioning, but when a person's body temperature rises rapidly, sweating just is not enough. Heat-related illnesses can be serious and life-threatening. Very high body temperatures may damage the brain or other vital organs and can cause disability and even death. Heat-related illnesses and deaths are preventable.

What are some common heat-related injuries in sports?

Exertional Heat Stroke (EHS): EHS is the most serious heat-related illness. EHS is a medical emergency. It happens when the body's temperature rises quickly, and the body cannot cool down. Student-athletes can die or become permanently disabled from EHS if not properly recognized and managed. EHS is one of the leading causes of death in young athletes, especially in Florida. The two main criteria for diagnosing EHS are rectal temperature >105F (40.5C) immediately post collapse and central nervous system (CNS) dysfunction. There are many signs and symptoms associated with EHS. Parents and student-athletes should familiarize themselves with these by viewing the free video resources provided by the National Federation of High School Sports (NFHS) or the FHSAA.

- . EHS is preventable by taking the proper precautions and understanding the symptoms of someone who has become ill due to heat.
- EHS is survivable when quick action is taken by staff members that includes early recognition of symptoms and aggressive cold-water immersion.

Heat Exhaustion (EHI): Heat exhaustion is the most common heat-related condition observed in active populations including student-athletes. EHI is a type of heat-related illness. EHI is defined as the inability to continue exercise in the heat because the heart has difficulty providing enough oxygenated blood to all the working organs and muscles. It usually develops after several days practicing or conditioning in high temperature weather and not drinking enough fluids.

Heat Cramps: Heat cramps are painful, involuntary cramping often in the legs, arms, or abdomen with muscle contraction. Cramping usually occurs in the preseason conditioning phase when the body is not properly conditioned and more subject to fatigue. Heat cramps can easily be treated with rest, stretching of the muscle, and replacement of fluid and electrolytes. The exact mechanism of muscle cramps in warm environmental conditions is unknown but can be caused acutely by extensive dehydration and sodium losses or chronically via inadequate electrolytes in the athlete's diet. Although heat cramps are not a cause of sudden death, it can be confused with the more serious condition, exertional sickling.

Is my student at risk?

Yes, all student-athletes are vulnerable to exertional heat stroke and other heat-related injuries. While every student-athlete can succumb to EHS, newer data is reporting a high incidence of exertional heat stroke cases in football players, especially those who play the lineman position and in very lean distance runners. Research also states many reports of EHS emergencies are during summertime or preseason conditioning sessions. Other conditions that can increase your risk for heat-related illness include obesity, fever, dehydration, poor circulation, sunburn, and prescription drug or alcohol use.

What is the FHSAA doing to keep my student safe?

The FHSAA has published Policy 41, titled "Exertional Heat Illness". This policy provides specific procedures for schools to educate student-athletes and parents on EHI as well as strategies to prevent these injuries. FHSAA Policy 41 also provides procedures for schools to follow for preseason acclimatization, environmental monitoring, and the inclusion of cooling zones for the management of a student-athlete suffering from a heat injury.

How can I help to keep my student safe when it comes to the heat?

- Learn more about heat-related injuries in sports at https://www.nfhs.org/media/1015695/ksi-5-pillars-of-exertional-heat-stroke-prevention-2015.pdf
- . Discuss nutrition, proper hydration, body weight, and the importance of sleep and rest with your family healthcare provider at the time to the sports physical
- Talk to your school and coach about safeguards they have in place to keep kids safe in the heat and what they will do for someone who becomes ill or injured
- · Monitor fluid intake of your student while at home and routinely check in with your student-athlete to inquire about how they feel
- · Report any concerns with your school's athletic trainer, team physician, coach, or your family healthcare provider

By signing this agreement, I acknowledge the annual requirement for my child/ward to view the "Heat Illness Prevention" course at www.nghslearn.com. I acknowledge that the information on Heat-Related Illness has been read and understood. I have been advised of the dangers of participation for myself and that of my child/ward.
